Summary

My future plan is to build a career in developing responsive, dynamic websites with interactive features, focusing on enhancing user engagement and improving user interaction to help businesses connect better with their audience.

Technical Skills

Languages:	HTML, CSS, JavaScript
Frameworks/Libraries:	React js, Node.js, Express js
Tools:	Git
Databases:	MongoDB
Other:	REST APIs

Projects

Health Scope

- HealthScope is a user-friendly platform for booking and managing health tests, providing test results, and tracking health-related statistics.
- Online Health Assessments
- Diagnostic Test Booking
- Secure Payment Gateway
- Live Link — Client Link — Server Link

Product Alter

- The Product Alter website helps users find, post, and recommend product alternatives, offering interactive features like commenting, updating, and deleting posts.
- Product Alternative Search: Users can find or request alternatives for products.
- Interactive Posting: Users can post, update, delete posts, and comment on others' posts.
- Personalized Recommendations: View and manage comments and recommendations in dedicated routes.
- Live Link — Client Link — Server Link

Craft House

- The Crafts House website is a platform for painting enthusiasts to explore their creativity, create, buy, and sell crafts, with features to filter and showcase crafts based on price and ratings.
- Craft Marketplace: Users can add, sell, and buy crafts.
- Craft Filtering: Filter crafts by price and rating.
- Interactive Features: Integration of React Awesome Reveal and React Tooltip for enhanced user experience.
- Live Link — Client Link — Server Link

Certifications

- Complete Web Development Course By Jhankar Mahabub - Programming Hero, Jan 2024 - July 2024
- Certified Front-End Developer - Programming Hero Institute, Jan 2024 - july 2024
